On May 5th 2010 the Singheimer family's life changed forever. Their 3 yr old daughter, Malena, was diagnosed with Bi-lateral Retinoblastoma. Retinoblastoma is a very rare childhood cancer, about 400-500 cases per year. 90% of the cases affect children 5 yrs old or younger.

On May 14th, Malena had to have her right eye removed and started chemo immediately to treat the small tumor in her left eye.

Malena is progressing well and is looking forward to going back to school in August.

All proceeds will go to the Singheimer family to assist with medical costs.
